Appendix C
Decision-Making Flowchart – Resuming Research Activity on Campus

Goal: Decide on suitability of recommendations for increased activity. Note: Decisions are subject to next-step logistical review, including for consistency across academic units.

Key considerations: Principles and prioritization criteria defined by PRT/PEC, identified funding source for any new cost associated with the return plan, necessary supporting services, alternate mode of performing the activity, phase during which the activity should return.

Goal: make the return plan as safe and effective as possible.

Key considerations: activity being undertaken, location, time & dates on campus, traffic flow, safety plan, appropriateness of PPE, supporting services, renovations/construction, protective equipment consumption, ability to halt activity in case of incidents

Goal: logistical review for consistency and coordination across the university.

Membership: Darcy Mardnik, Dion Martens, Irena Creed, representatives from ADRs

Researcher request to return or increase activity on campus.
