We have a plan
We have implemented a COVID-19 operations plan based on:
• Local, provincial and federal health orders
• USask Safety Resources
• Industry practice amongst post-secondary institutions
• Feedback and experience from working in our new environment

Here’s what we’re doing
• Prioritizing urgent and emergency projects
• Monitoring all buildings and building systems
• Disinfecting high-touch surfaces
• Enhancing cleaning protocols for public spaces
• Monitoring supply levels of hand soap, hand sanitizer and paper products
• Suspending non-essential service work

Here’s what you can do
• Only use areas that are approved to be open
• Make sure you are authorized to access open areas
• Consistently wash your hands, maintain social distancing and follow health protocols
• Follow the directions on the COVID-19 campus signage
• Stay home if you are sick. If you believe you have COVID-19, call HealthLine at 811

Together, we can make a difference
